Mr Mackintosh

Glasgow

Dear Charles Rennie Mackintosh,

I have heard that you have designed fabulous tearooms. With excellently famous high-back-chairs, great light fittings, spectacular wall decorations, and even the cutlery is designed by you! I am very excited because one day I might be able to go the tearooms!

If I could design a tearoom it would have: huge and shiny chairs, spectacular wallpaper, excellent tables, dazzlingly shiny cutlery, and a huge room with lots of toys in it for the children to play in.

It would be amazing, and when you walked in you would shout in amazement! I have heard you liked using nature and Japanese designs so my tearoom would be covered top to bottom in them (because I like your designs)! I like the way you designed your rose, and I have had a go at drawing it and I have asked my Mummy to put it in a picture frame. I would also have a football design on the ceiling of my tearoom (because I like football a lot) and my lamps will brighten the football decorations up. For an exciting reaction I will put a map of the world as wallpaper for the bathrooms! Maybe I could even have plastic sculptures of animals too.

Do you like visiting your tearooms? And is the cake good? My favourite cake is carrot cake because it is really yummy and delicious, what is yours? I like visiting tearooms and cafés because it allows me to have more cake and tasty drinks! What are your favourite drinks?(I like Fanta a lot and diet coke) I think that you like visiting your tearooms because you designed them, but do you? (I definitely would) and do you like ice cream? (I do) and what is your favourite flavour? (mine are: salted caramel, vanilla, strawberry, and rum and raisin!). Do you like ice cream in a bowl or cone? (I like mine in a cone)!

I also have some other questions to ask you:

Did you always want to become an architect?

What did you like to do as a child?

Why did you become an architect?

From,

Leo Weekes.

P.S, I am going to send this letter with my drawing of the Mackintosh rose!
